

a small contribution to make life happy

mmBelleriveVD

a short summary after ten month of researches

the association mmBelleriveVD (maison de maître à Bellerive VD) will buy this residence and look for life and good vibes in this place.

There shall be flats, stores, places for studies. The small parc, the chapel, the location itself is calm, with an own source, some place for gardening and place for workshops. An important pillar of the business on place will be the kitchen, another one the place for further education offers (arts, management, politics, international relationship). The whole place is following the UNESCO ideas of development, education and respect for each other. The store, the business take care about local interests and will be guided of people who are living in the house itself or in the neighbourhough. As this place was for hundert years the possibility for old people to live their last days at this nice place and then to die. So this future community will be a humble place, working mostly quiet and happy minded that this place will be a source for happines, humour, respect and a deep optimistic look to the future without forget the huges challenges of our time. But only with hopefull visions we will contribute to good questions that will find meaningfull solutions.

With this target the association mmBelleriveVDtakes care that the renovation of the place is managed with material of high quality but although it's important that all constructions – for rooms, for business and social network – has to be in this mood of respect and dignity.

The founder and initiator of this association is working since more than 30 years in education, including more than 20 years in a boarding school for children with behavioral problems.

The house will shine with clairity and calm, lounge, guest rooms, the hammam, the water (designed and solded in stores all over the country), the researches to questions of water and all neighbouring areas – movement, danse, changin society, but allthrough old young cultures with her possibility of making life good, hopefull and beautiful. Any retreat in this house will give the guest security and a hopefull regard to his own life and the time to come.

Any communities like Findhorn community in Schottland, like Sekem in Egypt, any association who looks for indiviual support is our idol-with all high thinking we dont' want forget the daily life and mantain the relationship to the genius loci.

Buildings services, heating, water supply, but although the businessplan and the management shall be at the top of actual knowledge. Quality in every areas is basically demanded. So this project is not only a social project, but althouh an art and technic - project.
